HOW DOES **pure** WORK?

AQUEOUS OZONE

Our technology takes cold tap water and infuses it with ozone gas to create our **Aqueous Ozone Solution**. CleanCore Solution's™ patented technology creates a cleaning solution that contains a high concentration of dissolved ozone in the form of **Nanobubbles**.

- When sprayed onto a surface the CleanCore Solution's™ **Nanobubble** solution is attracted to soils, germs and other contaminants.
- Once attached to the contaminants the ozone solution eliminates them; converting back to air and water
- **Nanobubbles** increase the cleaning effectiveness by thoroughly covering a surface, as shown above.
