

CCS1000 Ice System

Delivering **ozonated water** capable of maintaining a clean, bacteria free ice machine, as well as **producing pure, clear, quality ice.**

Our patented **Pure Aqueous Ozone technology** produces ice that is bottled water quality.

pure *Simple, Sustainable, and Effective.*

AQUEOUS OZONE

Aqueous Ozone converts back to air and water, reducing your carbon footprint. No storage, mixing, transporting, making it safe and simple to use.

- ◆ Help establish a pro-active ice machine safety program
- ◆ Prevents slime build up (bio film) in the cool environment of your ice machine
- ◆ Prevents bacteria & mold growth such as: *Listeria, Salmonella, E Coli, Norwalk Virus and Shigella*
- ◆ Keeps patrons safe from harmful bacteria responsible for many respiratory and gastrointestinal illnesses
- ◆ Helps prevent low water flow to the ice machine by keeping the water filter open and clear of mold and residue build up

TECHNICAL SPECIFICATIONS

Voltage	120 Volt	Flowrate	1.5 GPM
Amps	3 Amp fuse protected	Concentration	0.5 PPM
Weight	7 pounds	Inlet Pressure	35psi-85psi
Dimensions	8"W X 8"H X 4"D		

HOW DOES **pure** WORK?

AQUEOUS OZONE

Our technology takes cold tap water and infuses it with ozone gas to create our **Aqueous Ozone Solution**. CleanCore Solution's™ patented technology creates a cleaning solution that contains an effective concentration of dissolved ozone.

- When in contact with a surface the aqueous ozone solution is attracted to soils, germs and other contaminants.
- Once attached to a contaminant, the ozone eliminates it, converting the solution back to air and water.

pure 
AQUEOUS OZONE

- No storage, mixing, transporting
- Cleaning and sanitizing with one application
- Converts back to air and water, reducing your carbon footprint
- A safer, healthier path to clean!
